

# Instalacja środowiska

AiDOO

DEVOPS AND MORE

# Coś o mnie :)

Grzegorz Bołtuć

DevOps Engineer at CTDP Sp. z o. o. & co. sp. k.  
Torun, Kuyavian-Pomeranian District, Poland

Ansible in DevOps Torun-  
Bydgoszcz

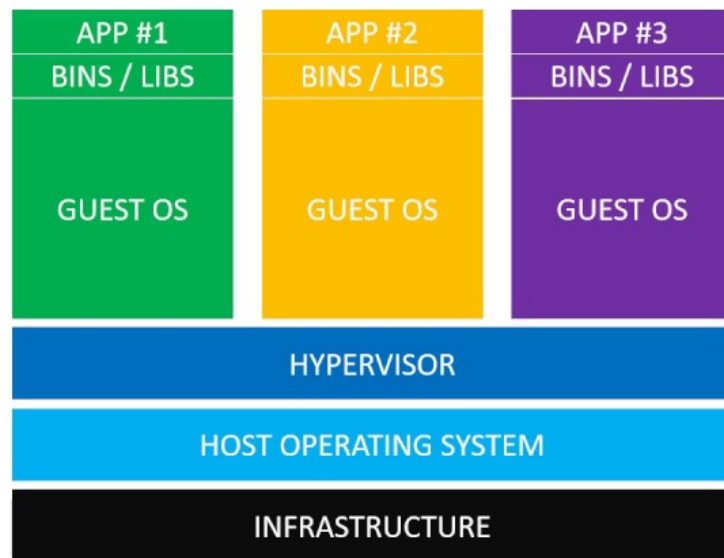

Uniwersytet Techniczny-  
Przyrodnic...

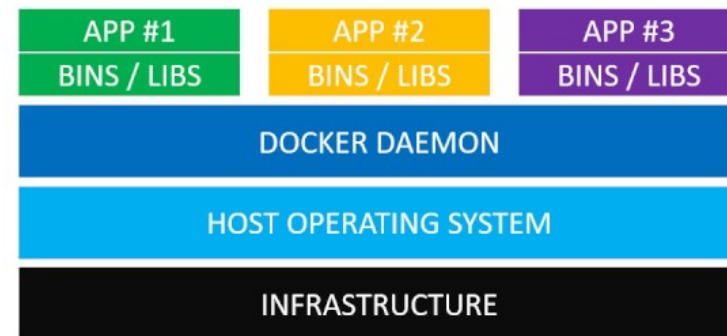

Po pracy:

- rodzina,
- sport: bieganie długodystansowe, żużel (czas na derby :D),
- podróże.

# Docker

Virtual Machines

Docker Containers

Zawsze tak samo

# Automatyczna konfiguracja

```
1 FROM ubuntu:19.04
2
3 MAINTAINER Grzegorz Boltuc
4
5 #ARG to creating user with sudo access
6 ARG SSH_ANSIBLE_USER
7 ARG SSH_ANSIBLE_PASS
8
9 #Install all components to Ansible
10 RUN apt-get -y update \
11     && echo "deb http://ppa.launchpad.net/ansible/ansible/ubuntu trusty main" >> /etc/apt/sources.list \
12     && apt-get install -y gnupg2 \
13     && apt-key adv --keyserver keyserver.ubuntu.com --recv-keys 93C4A3FD7BB9C367
14
15 # Install SSH and Ansible.
16 RUN apt-get -y update \
17     && apt-get install -y openssh-server wget sudo iputils-ping vim --no-install-recommends \
18     && apt-get install -y ansible \
```
